A score of 255 points (85%) must be obtained to successfully pass this course of fire. All of the rounds must be in the silhouette. Any rounds not accounted for on the target (in the black) will constitute an automatic failure of this course of fire. **Instructor must shoot 95% or better.**

Targets will be TQ 19, or other target as specified. Must include ocular orbital square in head.

If a bullet hole should touch a line, it gets counted as the higher of the two possible scores. Shooters will be provided with 15 seconds of "preparation" time before each stage to get in their positions.
